

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Tendercapital Global Bond Short Duration Fund (the Fund), a sub-fund of TENDERCAPITAL FUNDS plc (the Company) Retail Accumulating Share Class A (ISIN: IE00BYWPOS80)

Objectives and Investment Policy

The Fund aims to achieve a positive return over the medium term by investing in a wide range of debt securities mainly of Euro currency and listed on a Regulated Market (as set out in the Prospectus).

Investments could include fixed income and debt securities, such as bonds, senior notes (debt that takes priority over unsecured or more junior debt), subordinated debt (debt that ranks below other debt with regard to claim on assets or earnings), structured notes (a type of hybrid debt security which usually has a derivative component), certificates of deposit, medium term loan notes, asset and mortgage backed securities, collateralised debt and other debt instruments.

These investments will mainly be issued or guaranteed by any OECD government and/or by corporate or other issuers like special purpose vehicles.

No more than 10% of the NAV will be invested in collective investment schemes and no more than 30% of the NAV shall be directly invested in debt securities or bonds which, at the time of their most recent purchase, were not rated investment grade by at least one credit rating agency approved by the Company or which are deemed by the Investment Manager to have an implied rating of investment grade, for instance by reference to other securities or bonds issued by the issuer of the relevant security or bond.

The credit rating agencies currently approved for such purposes are Standard and Poors, Moody's, Fitch and DBRS.

The Fund may also hold ancillary liquid assets such as time deposits (a deposit account with a fixed maturity date).

The performance of the Fund will be benchmarked against EONIA (Euro Overnight Index Average) which is an effective overnight rate computed as a weighted average of all overnight unsecured lending transactions in the interbank market, initiated within the Euro area by the contributing panel banks.

The Fund may also use financial derivative instruments (FDI) for efficient portfolio management and/or for hedging (protect against/net off) exposure through FDI. These FDI may include futures, swaps, options, contracts for difference, spot and forward currency contracts, which may be exchange traded or over the counter. The Fund may use reverse repurchase agreements for efficient portfolio management.

You can buy or sell Shares on every Business Day in Dublin and London. Any net income the Fund generates will be reinvested and reflected in the value of your Shares.

For full investment objectives and policy details please refer to the prospectus of the Company (the Prospectus) which is available at www.tendercapital.co.uk

Risk and Reward Profile (SRRI indicator)

- Historical data used in calculating the above indicator may not be a reliable indication of future performance.
- The category shown is not guaranteed and may shift over time.
- The lowest category does not mean risk free.
- The indicator above indicates where the Fund ranks in terms of risk and return. As the Fund does not have a track record, the rank is based upon how similar investments to those that the Fund will invest in have performed in the past. The Fund ranks 3 based on the range and frequency of price movements (volatility) of the investments of the Fund.

The following are risks materially relevant that are not captured by the SRRI indicator:

- Investors should note the difference between the nature of a deposit and the nature of an investment in the Fund, in particular the risk that the principal invested in the Fund is capable of fluctuation and Shareholders may not have all of their principal returned to them on redemption.
- The Fund may enter into transactions in over-the-counter markets, which will expose the Fund to the credit risk of counterparties and their ability to satisfy the terms of such contracts.
- Since many FDI have a leverage component, adverse changes in the value or level of the underlying asset, can result in a loss substantially.

Please refer to the Risk Factors section of the Prospectus for details of relevant risks.

Charges for this Fund

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest		<p>The entry and exit charges shown are maximum figures. An exchange charge of up to 3% may be charged if you exchange your Shares for Shares in another Class. In some cases you might pay less – you can find this out from your financial adviser or distributor.</p> <p>The ongoing charges figure is based on expenses for a financial year. This figure may vary from year to year. It excludes:</p> <ul style="list-style-type: none"> • Performance fees; • Portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling units in another collective investment scheme. <p>For more information about charges, please refer to the Fees and Expenses section of the Prospectus and the Supplement for the Fund, which is available at www.tendercapital.co.uk</p>
Entry Charge	Up to 3%	
Exit Charge	Up to 3%	
This is the maximum that might be taken out of your money before it is invested in the case of the Entry Charge and before the proceeds of your investment are paid out in the case of the Exit Charge.		
Charges taken from the fund over a year		
Ongoing charges	1.74%	
Charges taken from the fund under certain specific conditions		
Performance fee	15% of the amount by which the NAV per share at the end of a Performance Period exceeds the Benchmark (the Initial Issue Price for the first Performance Period and the reported, final NAV at the end of the previous Performance Period for which a performance fee was payable thereafter). Please note that this is 10% in respect of the Institutional Accumulating Share Class	

Past Performance

<p>Tendercapital Global Bond Short Duration A</p>	<p>The Fund was authorised by the Central Bank on December the 4th</p> <p>As the Fund has been trading for less than a year at the date of this document there is insufficient data to provide a useful indication of past performance information to investors</p>
