

Tendercapital Bond Two Steps Fund

THE FUND IN A NUTSHELL – DECEMBER 2018

Key Features

Fixed income fund, euro denominated, which invests in Corporate and Sovereign Debt after an accurate and fundamental analysis of the Issuer. The team has large discretion concerning portfolio choices. Achieved results are not necessarily linked to market conditions, as they may depend on the particular strategy chosen by the fund manager.

Investment Policy

Identification of undervalued opportunities according to our investment process and continued monitoring of the issues.

The portfolio will comprise of diversified single investment opportunities, according to macro conditions, while trying to maintain a medium risk profile. The main guidelines for the investment are:

- ✓ Euro denominated financial instruments issued by Governments/companies/spv
- ✓ Non-investment grade securities up to 30% of AuM
- ✓ Derivatives admitted only for portfolio hedging purposes
- ✓ High yield instruments (max 30% of AUM)

Portfolio

FIXED-INCOME MARKET VIEW	BONDS EXPOSURE	CASH EXPOSURE & DERIVATIVES	SECURITIES
POSITIVE	100% NAV	0%NAV	Long-term fixed interest rate notes
NEUTRAL	100% NAV	0% - 10% NAV	Medium-term fixed interest rate notes, Structured Notes (CMS)
NEGATIVE	100% NAV	10% - 20% NAV	Floating rate notes, Step-up bonds, fixed-to-float bonds, short duration fixed interest bonds

Risk/ Return Profile

The profile may change over time. For further information regarding the risk/return profile, please read the KIID.

TARGET

The fund is dedicated to investors who look for a balanced diversification of the portfolio in the current macroeconomic scenario, where interest rates are close to zero and inflation is low. The Fund seeks to produce positive returns with low/medium volatility thanks to an investment process that combines views on macroeconomic scenarios with a deep analysis of the issuers.

STRENGTHS

The portfolio is managed in a dynamic way across all bond instruments. Portfolio construction is connected with the fixed-income market view. The fund's composition is able to adapt rapidly to continuous macroeconomic changes, which characterise the current global economic world.

WHY SUBSCRIBE

Given the management's dynamic nature, the fund is based on three strategies that adapt to the different market phases which marked the latest scenarios. The strategies are:

- **Floater**, choice of Fix-to-Floater notes (Swap 5-7 y), CMS (Swap 10y) and indexed with the objective of creating value through the strengthening of the inflation rate and the increase of benchmarks yields. The choice of issuers depends on the evaluation of the financial structure and the sustainability of debt for hybrid issuers;
- **Fix**, choice of fixed rate FIGs/Government inflation-linked notes with short duration, with the objective of protecting the capital in the medium term;
- **Special Situations**, choice of companies that will generate value due to their business models and/or extraordinary company events; choice of underrated issuers with expected improvements in their credit profile.
