Tendercapital Bond Two Steps (the Fund), a sub-fund of TENDERCAPITAL FUNDS plc (the Company) Retail Accumulating Share Class (ISIN: IE00B90F5P70)

Objectives and Investment Policy

The Fund aims to achieve a positive return over the medium term by investing in a wide range of debt securities mainly of Euro currency and listed on a Regulated Market (as set out in the Prospectus) and may also invest in equities (shares and related securities). Investments could include fixed income and debt securities, such as bonds, senior notes (debt that takes priority over unsecured or more junior debt), subordinated debt (debt that ranks below other debt with regard to claim on assets or earnings), structured notes (a type of hybrid debt security which usually has a derivative component), certificates of deposit, medium term loan notes, asset and mortgage backed securities, collateralised debt and other debt instruments.

These investments will mainly be issued or guaranteed by any OECD government and/or by corporate or other issuers like special purpose vehicles.

The Fund may invest up to 10% of its net asset value (NAV) directly or in directly in global equity securities across a range of industries mainly through investing in convertible bonds (securities that give the holder the right to convert the bond into shares) and warrants (securities that give the holder the right to buy newly created shares at a fixed price during a set period).

No more than 10% of the NAV will be invested in collective investment schemes and no more than 30% of the NAV shall be directly invested in debt securities or bonds which, at the time of their most recent purchase, were not rated investment

grade by at least one credit rating agency approved by the Company or which are deemed by the Investment Manager to have an implied rating of investment grade, for instance by reference to other securities or bonds issued by the issuer of the relevant security or bond.

The credit rating agencies currently approved for such purposes are Standard and Poors, Moody's, Fitch and DBRS.

The Fund may also hold ancillary liquid assets such as time deposits (a deposit account with a fixed maturity date).

The Fund may also use financial derivative instruments (FDI) for efficient portfolio management, investment purposes and/or for hedging (protect against/ net off) exposure through FDI. These FDI may include futures, swaps, options, contracts for difference, spot and forward currency contracts, which may be exchange traded or over the counter. The Fund may use reverse repurchase agreements for efficient portfolio management.

You can buy or sell Shares on every Business Day in Dublin and London. Any net income the Fund generates will be reinvested and reflected in the value of your Shares.

Risk and Reward Profile

- Historical data used in calculating the above indicator may not be a reliable indication of future performance.
- The category shown is not guaranteed and may shift over time.
- The lowest category does not mean risk free.
- The indicator above indicates where this Share Class ranks in terms of risk and return. The risk category for this Share Class ranks 4 based on the range and frequency of price movements (volatility) of the investments of the Fund.

The following are risks materially relevant that are not captured by the SRRI indicator:

- Investors should note the difference between the nature of a deposit and the nature of an investment in the Fund, in particular the risk that the principal invested in the Fund is capable of fluctuation and Shareholders may not have all of their principal returned to them on redemption.
- The Fund may enter into transactions in over-the-counter markets, which will expose the Fund to the credit risk of counterparties and their ability to satisfy the terms of such contracts.
- Since many FDI have a leverage component, adverse changes in the value or level of the underlying asset, can result in a loss substantially.

Please refer to the Risk Factors section of the Prospectus for details of relevant risks.
